

Stoolball England's suggestions for best practice

It is recommended that the ball is cleaned and disinfected every 6 overs. Players should also disinfect their hands with hand sanitiser every 6 overs. The ball should also be disinfected at the end of an innings.

It is recommended that facilities, which are used by other clubs and users, remain closed with no or limited access to toilets, changing facilities or hand washing facilities. If outside toilets are available these should be used over clubhouse ones.

It is proposed that the fielding team provide their own ball for the batting team to strike, and vice versa. Therefore, only the fielding team will touch that particular ball.

Each player should provide their own kit, bat and protective equipment. General team 'bat bags' are discouraged. Kit and equipment should be securely stored in a bag and not left out.

Clubs should look to set up a hand washing stations outside of their club houses where possible.

Players should arrive to games and practices either by walking or in their own car with members of their household or bubble. Public transport and car sharing is discouraged.
